

DOMESTIC PHOTO VOLTAICS

The content of this training course is designed to give the learner the foundation knowledge and understanding to build and install a domestic PV solar unit. This course is bespoke non-accredited continuous professional development (CPD) and is aligned to industry standards and requirements.

These training modules are provided by REVAMP Training Limited from its dedicated training centre at North Seaton, Ashington, Northumberland. Should a client wish for REVAMP Training Limited to undertake training at its premises, this can be undertaken with prior agreement. All prices available upon request via: info@revamptraining.co.uk or by contacting +44 1642 220778.

Training course content will focus upon:

- Introduction to renewable technologies.
- Health & Safety.
- Electrical Principles.
- Roofing Fundamentals.
- PV Systems – Preparation and Planning.
- PV Systems – Installation.
- PV Systems – Safe Connection.
