

DETAILED HYDROGEN THEORETICAL AND PRACTICAL BASED RISK ASSESSMENTS

In addition to the 1 day accredited Hydrogen awareness course incorporating an Awareness of Hydrogen and Hydrogen Technologies, Hydrogen Fundamentals, Hydrogen Manufacture and Safety, Hydrogen Distribution and Safety, Hydrogen Safety, Storage and Handling and Training and Competency Requirements. REVAMP Training Limited offer an overall 4 day CPD course incorporating Hydrogen safety analysis and risk assessment management. The course covers Hydrogen Awareness (Accredited Level 1) plus duties and responsibilities, regulatory legislation, Hydrogen hazard identification and risk assessment both theory and application, key considerations and emergency responses. Additionally, Hydrogen systems, facility design and construction, alongside system components will be examined together with a scenario based Hydrogen analysis exercise. Please note that Hydrogen Awareness course is 1 day duration whilst detailed theoretical and practical risk assessment courses are held over 3 days.

The training course is provided by REVAMP Training Limited from its dedicated training centre at North Seaton, Ashington, Northumberland. Should a client wish for REVAMP Training Limited to undertake training at its premises, this can be undertaken with prior agreement. All prices available upon request via: info@revamptraining.co.uk or by contacting +44 1642 220778.
